KING'S E-LAB FINAL SHOWCASE · 2 OCTOBER 2026

BNOC

Your campus. Your call.

The gamified social network that tests how well you know your community.

Your first call: will this pitch finish in under 4 minutes? Hands up for YES.

Big Name On Campus · bnoc.netlify.app

WHO WE ARE

Built by the community it is for

Six of us, one cohort, and BNOC's first players.

Alexander Newman
Partnerships Lead
Local businesses and prizes

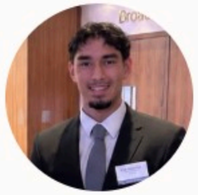

Jacopo Perissinotto
Product and Technology Lead
The app and how it works

Utsav Bahl
Finance Lead
Pricing, model and funding

Araha Uday
Marketing Lead
Brand and campus launch

Mark Zubritskas
Data and Insights Lead
What the numbers tell us

Joseph Hobday
Trust and Safety Lead
Rules, consent and compliance

WHY

Always online, rarely together

70%

of students living in halls feel lonely or isolated

38%

more likely to feel lonely: students who use social media 30+ hours a week

100%

of Gen Z in one survey would take action to support local businesses

Every week there's a formal, a match, a night out. Most of us only hear about it the morning after.

Sources: PfP Students poll · Journal of American College Health 2025 (US study) · Faire survey via MarketingCharts

WHAT

How well do you know your community?

BNOC is a gamified social network: you call what your people will do next.

1

Join a community

Your college, a society, your friends. Or start your own.

2

Call what happens

“Will 100 people come to E-Lab's formal dinner?”

3

Win at local places

Right calls earn points, and prizes from local businesses.

WHO IT'S FOR **Students, freshers first** **Societies and colleges** **Local businesses**

The only call you can change by showing up.

HOW

The better you know your people, the higher you climb

Commit to your call

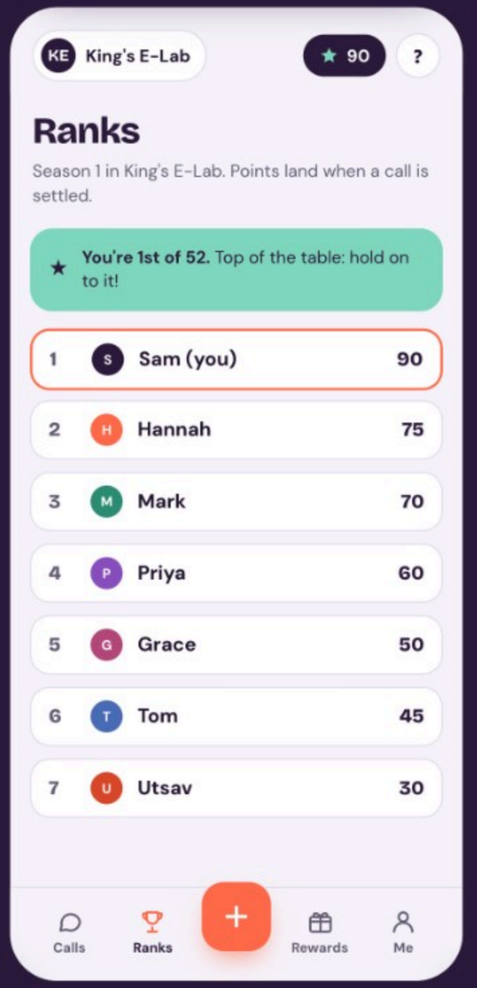

Say how sure you are. The surer you are, the more you win, or lose.

Climb the table

Points put you on the leaderboard. Top it, and you are the Big Name On Campus.

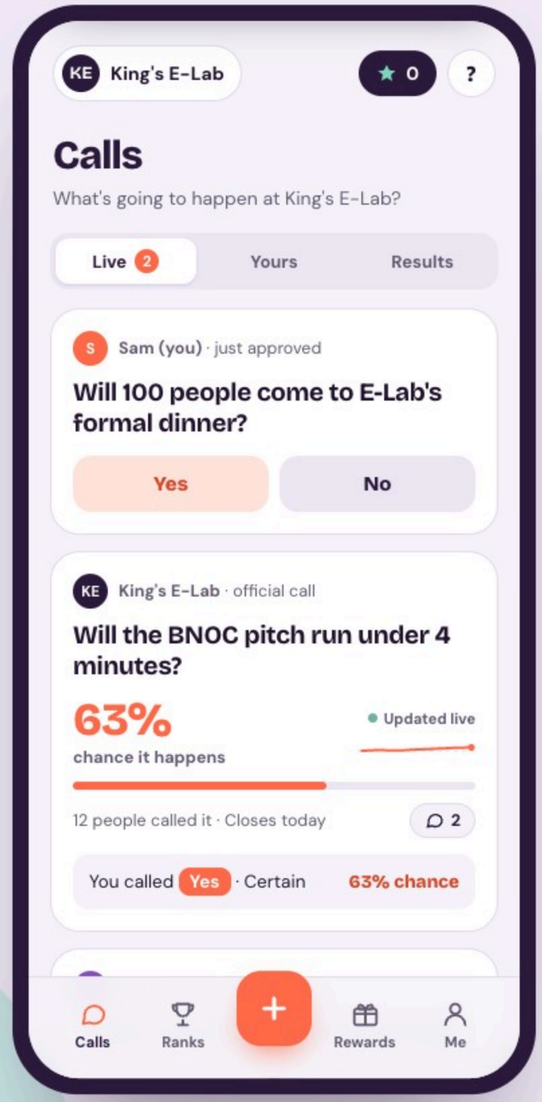

No real money

Free to play, so it is safe and open to everyone.

03 — CALL IT

Answer other people's. See what the crowd thinks.

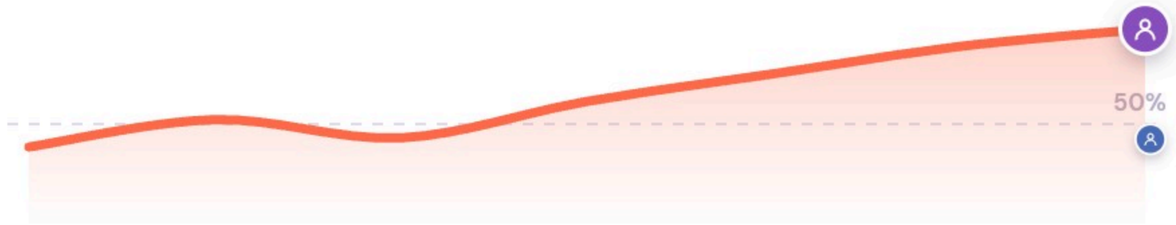

KE **King's E-Lab** · official call

Will the BNOC pitch run under 4 minutes?

63%

Updated live

chance it happens

12 people called it · Closes today

WHY THIS, WHY NOW

Keep the fun. Drop the gambling.

ON CAMPUS, IT COMES AT A COST

65%

of UK students gambled in the past year. Those who gamble spend about £50 a week.

No real money

Nothing to buy, stake or cash out.

Your data stays yours

Never sold. No ads at launch.

Off-limits topics

No relationships, health, looks or grades. No named person without consent.

Moderated

Organisers approve every question and can remove any comment.

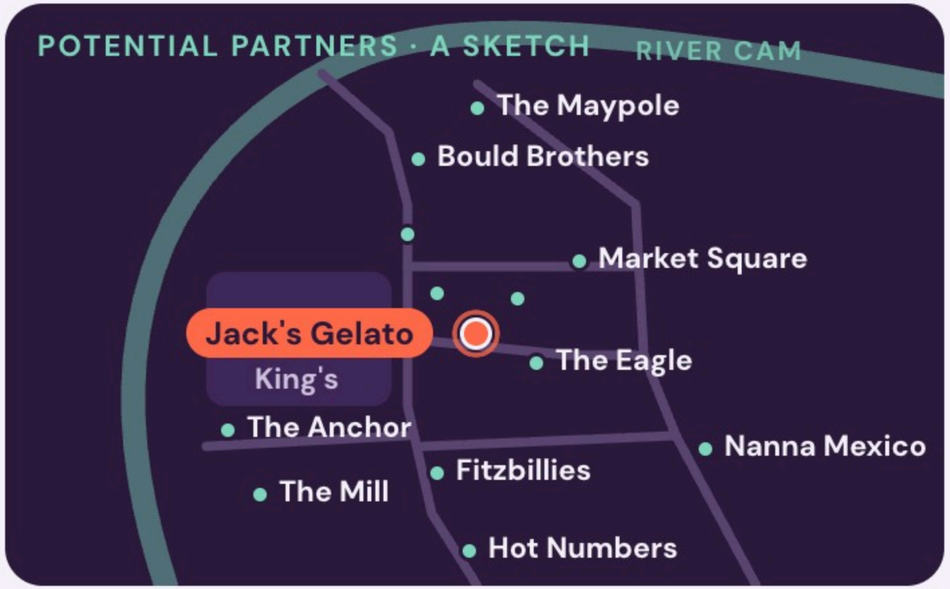

Free, and safe by design: built so that a university can say yes.

Source: Ygam / GAMSTOP student survey 2026 (n = 2,000). Cambridge email addresses only, first names on show.

THE PLAN

Every college in six months, then the UK

NOW	**King's E-Lab pilot** One cohort, playing this week.	**52** players so far
MONTH 6	**Every Cambridge college** With a college-against-college table.	**2,250** players
YEAR 2	**Five more universities** Newcastle, Durham, Oxford, Manchester, Bath.	**16,700** players
NATIONAL	**Campuses across the UK** A playbook run by student ambassadors.	**286,000** players

It spreads by itself: every call is a link you send to your friends.

One assumption: 1 in 10 students plays where we launch. For comparison, the campus app Fizz reported 95% at Stanford.

HOW WE MAKE MONEY, AND OUR ASK

Users never pay. Here's who does.

1. **Local venues** · from month 6 — **£100** per challenge
   A café or pub pays to run a challenge with its own prize.
2. **Sponsored calls** · from year 2 — **£500** per campaign
   Employers and brands pay to fill an event or launch a product.
3. **Licences** · from year 2 — **£10k** a year per campus
   Students' unions and colleges pay for their own leagues.
4. **Ads in Rewards** · at scale — **~£3** per 1,000 views
   Any brand can advertise beside the prizes. No data sold.

ONE CAMPUS, ONE YEAR — **about £30,000 with 2,250 players**

£10k venues · £9k sponsored calls · £1k ads · £10k licence. Two-thirds is advertising.

OUR ASK

£10,000

to reach every Cambridge college, and our first ten paying venues, in six months.

- **£5,500** **Building it** — Login and prize codes
- **£2,000** **Running it** — Hosting, moderation, legal
- **£2,500** **Growing it** — Launch prizes, 31 colleges

Live today: 52 players this week · 134 calls made. Prices are targets we will test in paid trials this term, not results.

YOUR FIRST CALL

Social media made us spectators. BNOC gets us to show up.

FOR QUESTIONS

Back-up slides

The product screen by screen, the rules, what is live, the market and unit-economics maths, competition, trust and regulation, risks, the funding approach, and sources.

BACK-UP · WHO IT'S FOR

Everyone who needs people to show up

Up = more influence · Right = more interest in BNOC

PRIMARY USER

Students, starting with freshers

They arrive every October knowing no one, looking for where they belong.

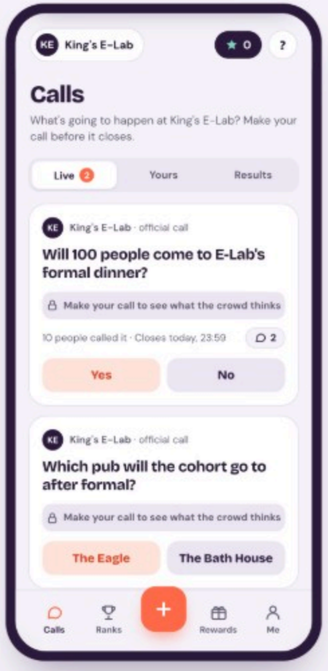

FIRST TO PAY

Cafés, pubs and venues near college

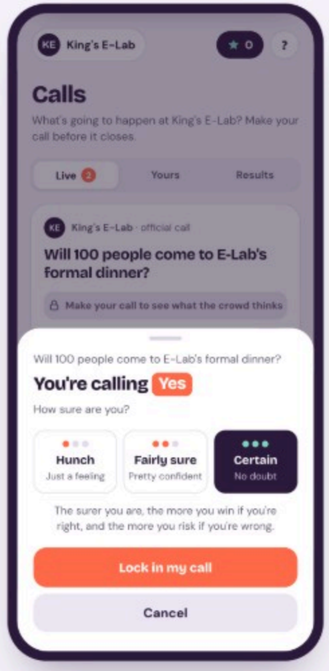

Quiet midweek nights and marketing they can't measure. Eight pubs close every week.

Source: government figures for England and Wales, first half of 2025 (Morning Advertiser)

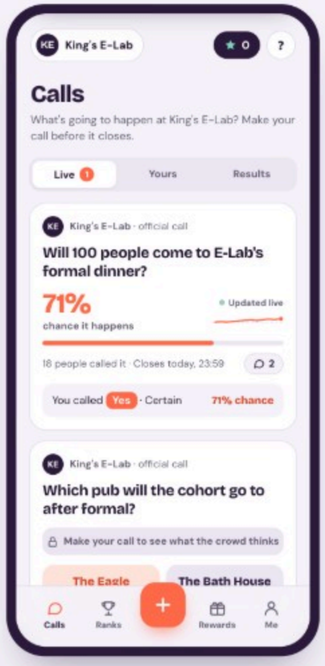

The product, screen by screen

1 · The feed

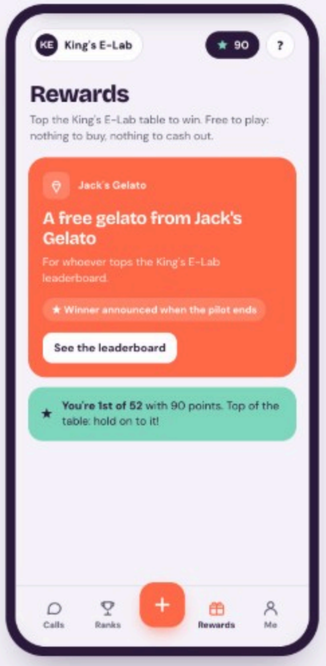

2 · How sure are you?

3 · What the crowd thinks

4 · The leaderboard

5 · Rewards

Screens from the live app at bnoc.netlify.app, with sample data

BACK-UP · THE RULES

How scoring and the crowd's odds work

Your confidence	If right	If wrong
Hunch	+10	0
Fairly sure	+15	−10
Certain	+20	−30

The points are set so that honesty pays. On average, Hunch scores best if you are up to about 67% sure, Fairly sure between 67% and 80%, and Certain only above 80%.

Points cannot be bought and have no cash value, so nobody can lose anything they own.

Weighted by confidence

The crowd's odds average every call as a probability, so a Certain call moves it more than a Hunch.

Steady from the first call

Every question starts at 50%, so a handful of early calls cannot swing it to an extreme.

Independent answers

The odds stay hidden until you have made your own call, so nobody copies the crowd.

Scored on the server

Calls lock once made and when a question closes. Nobody can edit their own score.

BACK-UP · PRODUCT STATUS

What is live, and what comes next

LIVE TODAY

- Join with a Cambridge email
- Two-answer calls, three confidence levels
- Live crowd odds with a trend line
- Season leaderboard
- Comments and call suggestions
- Rewards page set by the organiser
- Organiser tools to post, settle and moderate
- Privacy notice and delete-my-account

NEXT

- Several communities to join or start
- Redeeming prizes in the app
- Check-ins at events, with a show-up bonus
- Friends' groups inside a community
- Verified email login
- A consent step for calls naming a person
- Partner dashboard and pay-per-visit
- Questions drawn from calendars and fixtures

The pilot joins people by name and email without verification; verified login comes before any wider launch.

BACK-UP · MARKET MODEL

How the market numbers are built

Step	Students	Institutions	Revenue a year at £1.34 a student
Cambridge	22,565	31 colleges	£30,200
United Kingdom	2.86 million	about 160 universities	£3.8 million
United States	20.1 million	5,615 institutions	£27 million
World	269 million	not counted	£360 million

Where £1.34 comes from

Target revenue of £30,200 a year at Cambridge, divided by its 22,565 students. It assumes one student in ten plays. A planning figure, not a result.

Beyond campus

Local businesses in the US will spend $186.1bn on local advertising in 2026. Total UK advertising was £46.7bn in 2025.

Comparables

BeReal began on campuses and sold for €500m in 2024, with over 40 million users. Strava, a social network built on real-life activity, was valued at $2.2bn in 2025. Valuations, not our market.

Sources: HESA · NCES · UNESCO · BIA Advisory · Advertising Association / WARC · TechCrunch · Strava

BACK-UP · UNIT ECONOMICS

One campus at maturity

Revenue line	Assumption	A year
Local venues	20 venues × 5 challenges a year × £100	£10,000
Licence	One students' union or college group, for a year	£10,000
Sponsored calls	18 employer and brand campaigns at £500	£9,000
Ads in Rewards	405,000 views a year at about £3 per 1,000	£1,200
Total	With 2,250 players: one student in ten	£30,200

Costs

About £10,000 a campus: student ambassadors on commission, hosting and moderation. Prizes are funded by the venues.

Why £100 a challenge

One simple price a café can say yes to. At about £3 made on each sale, it pays for itself with 35 extra customers. The first challenge is free.

Every figure on this slide is a target to test in the pilot, not a result.

BACK-UP · COMPETITION

How BNOC differs from what exists

Product	What you put in	What it is about	Who you are	Gets you out?
Fantasy Premier League	Nothing	One national sport	A manager	No
Fizz, Yik Yak	Nothing	Campus gossip	Anonymous	No
Instagram, WhatsApp	Nothing	Everything	Yourself	Sometimes
UNiDAYS, Student Beans	Nothing	Discounts	A verified student	No
BNOC	Nothing	Your own community	Your first name	Yes, by design

Why the big platforms cannot simply add this: feeds and group chats do not know a community's calendar, fantasy games only cover national sport, and anonymous apps cannot earn a university's endorsement.

BACK-UP · TRUST AND REGULATION

A game, not a bet: the detail

No money, by design

Nothing to buy, stake or cash out. In Great Britain, free draws and prize competitions with no payment to enter sit outside the Gambling Act 2005. We will take legal advice before scaling.

A real community

Institutional email addresses only, and first names on show. Verified login replaces the pilot's simple join before any wider launch.

Rules against harm

No calls about relationships, health, appearance or grades. A call about a named person will need that person's consent, and they can remove it.

Moderated, and yours to leave

Organisers post the official calls and review every suggestion. Comments can be removed. Anyone can delete their account and data in one tap.

Source: Gambling Commission guidance on prize competitions and free draws

BACK-UP · RISKS

What could go wrong, and our answer

Risk	Our answer
A new community starts empty	Organisers post official calls from day one, so the feed is never empty.
The novelty fades	Weekly reveals, seasons that reset, real prizes and friends' groups.
A call embarrasses someone	Banned topics are blocked, named people must consent, organisers moderate.
It is seen as gambling	No money anywhere. Built for a university to endorse; legal advice before scaling.
Partners do not pay	Price and pay-per-visit are tested with pilot partners before we expand.
A big platform copies it	Their unit is the feed. Ours is the community, and its trust.

BACK-UP · FUNDING APPROACH

Prove it cheaply, then raise

NOW

Bootstrapped

The app runs on free hosting. The pilot costs time, not money.

NEXT

£10,000 initial investment

£5,500 software, £2,000 running costs and a legal review, £2,500 launch rewards, to reach every Cambridge college.

THEN

A larger round

Raised once the show-up rate is measured, to launch other universities.

MILESTONES

Month 3

Check-ins and friends' groups live. Ten local partners. First measured show-up rate.

Month 6

Users in every Cambridge college. First paying partners.

Month 12

Newcastle, Durham, Oxford, Manchester and Bath live, and the evidence for a larger round.

Milestones are targets, not results.

BACK-UP · SOURCES

Where every number comes from

- Faire survey, via MarketingCharts: Gen Z and support for local businesses
- PfP Students, Room to Belong (poll by Opinium): 70% of students in halls feel lonely or isolated
- Journal of American College Health, 2025 (65,000 US students): heavy social media use and loneliness
- Morning Advertiser, August 2025: 209 pubs closed in England and Wales in six months
- Premier League: 11.43m verified Fantasy teams, 2024/25
- Ygam / GAMSTOP, Annual Student Gambling Survey 2026 (n = 2,000)
- Eventbrite, Reset to Real, January 2026: 18 to 35s and live events
- Save the Student, National Student Money Survey 2025: £61 going out, £49 eating out a month
- HESA, student statistics 2024/25: 2,863,180 UK students; Cambridge 22,565
- UNESCO: 269m students in higher education in 2024
- NCES, fall 2024: 20.07m US students at 5,615 institutions
- BIA Advisory Services, September 2026: US local advertising $186.1bn
- Advertising Association / WARC: UK advertising £46.7bn in 2025
- TechCrunch, June 2024: BeReal sold to Voodoo for €500m
- Strava, May 2025: valued at $2.2bn
- Gambling Commission: guidance on prize competitions and free draws
- Our estimates: £3.8bn = 2,863,180 × £110 × 12; £1.34 = £30,200 ÷ 22,565
